John,

Do you know when you may receive the groundwater sampling forms from Dave? I don't know if these are required as a submittal.

I am curious to see if the water levels in the paired wells show a strong downward gradient.

Thank you.

John,

Thank you for sending the VI scope. I will discuss here and with Kristen and hope to be able to get back to you this week with any comments.

Subject: FW: Tower Standard VI Scope

Bob and Kristin

Please see the information below relating to Alyssa Sellwood's recommendations for vapor intrusion sampling at the Hotel and Tower Standard building. Alyssa is a program expert who works on vapor intrusion issues. The sub slab sampling point at Tower Standard will be taken in the office area. The proposal calls for 3 -4 samples to be collected in the Hotel crawl space and those samples to be paired with samples in the hotel. Please let me know if this scope is acceptable and we will work with REI on developing a scope for this work.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

John-

Per our call this morning, attached is a suggested scope of work w/map for the Tower Standard site. The screening levels based on the Wisconsin criteria are also included in the Word document.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
